

Figure 1 consists of 12 histograms, labeled (a) through (l), each representing the distribution of the number of non-zero elements in the rows of the matrix  $A_k$  for  $k = 0, 1, \dots, 11$ . The x-axis for all histograms is 'Number of non-zero elements' ranging from 0 to 100. The y-axis is 'Frequency' ranging from 0 to 10. The distributions are roughly bell-shaped and centered around 50-60 non-zero elements.
